Young Onset Dementia

9

Helpful Resources

More than 28,000 people in Canada live with young onset dementia (YOD). **'Young onset' means someone is under 65 when they develop dementia.** YOD affects people aged 18 to 64.

YOD is a diverse condition. An individual's experience of living with YOD will be influenced by many factors including their family system, job or income, gender and ethnocultural community.

Click the links below to explore example resources from the Toolkit and learn more about the impacts of YOD.

Understand YOD

[What is Young Onset Dementia?](#)

Alzheimer Society of Canada

The good news is that there are many ways to live well with young onset dementia. There is also lots of research unfolding worldwide to better understand the diseases that can lead to this kind of dementia. Find out more in this brief animated video.

[Younger Onset Dementia Guide](#)

Dementia Australia

Go-to resource for people living with younger onset dementia and their care partners.

[Living with Young Onset Dementia](#)

Social Care Institute for Excellence
